

RedFox Tech Rider 2023

DRUMS (Kick, 2 snares, rack tom, floor tom, cymbals, hi-hats) BASS HOUSE AMP (Ampeg)
ACOUSTIC DI
MARSHAL SM57
BANJO HOUSE AMP (Fender Twin Reverb)
VIOLIN DI
SLIDE GUITAR DI
KEYS DI (Stereo Signal)
LEAD VOCALS Sennheiser E945
BACK VOCALS Sennheiser E945

IMPORTANT NOTES:

- Band uses an **IEM** unit (MR18) to run their own monitor mix. Band will provide monitor tech with **SNAKE** split (Outputs on next page). Outputs not listed below such as drums and bass will be using house lines.
- Our drummer will provide his own kit if possible
- Bass and Banjo will need floor monitors.
- Acoustic guitar signal is split between the clean DI signal and the Marshal amp.
- Our vocalists use vocal processor pedals with occasional effects (*radio effect, harmonizer*) for certain songs. They usually run their own **Reverb + Compressors** but

will turn off those effects if asked from FOH. They use their own microphones.
